

Winter Bills: How To Save Energy & Money

Winter Season and Heating Costs

About Atmos Energy

The Value of Natural Gas

- **Warm and comfortable heating.**
 - over 20 degrees warmer than an electric heat pump.
- **Faster and more efficient hot water.**
 - recovers hot water almost 3 times faster than electric.
- **Precise temperature control for cooking.**
 - the world's best chefs prefer natural gas for cooking.
- **More efficient and faster clothes drying.**
 - does not over-dry clothes, resulting in less stress and fewer wrinkles.

Manage Your Energy Use

Control your thermostat

- Set your thermostat at 70 degrees or lower in the winter.
- Your heating bill will increase 4-6% for every degree setting above 70 degrees during the winter.

Manage Your Energy Use

No-Cost Tips

- Ceiling fans should run in the opposite direction of summer use, to gently circulate warm air.
- Lower the thermostat setting on your water heater.
- Keep windows, doors, and air vents closed in unused rooms.
- Open drapes on sunny days to let the sun heat your home. Be sure to close them at night and on cloudy days.

Other Ways We Can Help

- Atmos Energy works with community energy assistance agencies across the United States. In Kansas we work specifically with The Salvation Army (877-566-2769, ext 403).
- Customers contribute, and Atmos matches.
- Other non-profit agencies accept applications from customers who need assistance and share the available funds according to their established program guidelines.

Other Ways We Can Help

- Eligible customers can enroll or Atmos Energy can help put you in contact with energy assistance programs to help supplement high energy costs.
- LIEAP- Low Income Energy Assistance Program.
- Contact your local Social and Rehabilitation Services (SRS) office or call 800-432-0043.

Contacts

- Atmos Energy's highest priorities are safety and reliability.
- If you smell gas LEAVE the area immediately and call from a safe distance.
- Gas emergency 1-866-322-8667 or 911.
- Customer support center
- 1-888-286-6700.

Why a Green Seminar?

What They Are Branding

What Is Your Carbon Footprint?

Sierra Club

- Electricity in Midwest primarily from coal generation
- Carbon Footprint larger from use of electricity than from natural gas use
- Best use of natural gas is direct end use

Summary

- Natural Gas Is A Green Product
- Natural Gas Is A Domestic Energy Source
- Natural Gas Is Much More Efficient Than Electricity
- End Use of Natural Gas Is Green

Let us change the way you look at natural gas.

Natural gas is one of the cleanest sources of energy on the planet. So, it's not surprising that Atmos Energy is a proud sponsor of environmental initiatives with home builders in North Texas. We can even show you how to make your home more energy efficient with our online Home Energy Profile. Go to atmosenergy.com/energytips for more information.

Your midwest utilities have joined together to educate consumers on how to save energy.

HUEE is one of the only local utilities collaborative in the nation working together on residential energy efficiency issues. We are not selling you anything. We are not hosting seminars. We don't even want you to join anything. We must fight the battle together, and we are here to show you how.

ENERGY TIP #6
USE THAT BATHWATER
After you have taken a hot bath, leave the water in the tub until it cools to help heat the home in winter.
